

SEGUN ADETAYO

Product Marketing Leader · Apps & Ecosystem · Platform & Partner GTM
Seattle, WA · seguna.adetayo@outlook.com · (603) 276-6821 · linkedin.com/in/segunadetayo

Platform and ecosystem marketing leader who has built both sides of partner GTM at scale: supply programs that activate ISVs and SIs to build on a platform, and demand programs that drive developers and enterprise buyers to adopt the solutions they create. Background spans AI infrastructure platforms and a decade marketing complex regulated products to institutional buyers, the same discipline that makes financial infrastructure GTM legible. I think in platform terms: network effects, partner value chains, and ecosystem positions that extend core products and compound over time.

EXPERIENCE

Microsoft · 2 yrs 9 mos · *Progressive Experience*

Jul 2023 – Present

Global Product Marketing Lead — Digital Apps Innovation Marketing

Jul 2024 – Present

- Drove \$320M+ in qualified ecosystem pipeline by translating AI infrastructure platform capabilities into differentiated narratives for developer, startup founder, and enterprise buyer audiences; developed GTM playbooks, pitch decks, and competitive benchmarking frameworks adopted by field teams across 30+ global markets; engaged analyst relations to elevate platform ecosystem visibility and shape external coverage of platform differentiation vs. alternatives
- Built the supply side of the Azure AI platform ecosystem from zero: secured 40+ strategic ISV partnerships listed on Azure Marketplace, onboarded 200+ SI partners, and produced pitch decks, better-together solution briefs, and competitive battlecards that equipped field teams to position ecosystem solutions as extensions of core platform capabilities rather than standalone add-ons; partner showcase assets hit 10,000+ views each within 90 days of launch.
- Led demand side developer ecosystem activation and demand generation for GitHub Copilot x Azure: reached 635K+ developers across Devpost, MS Reactor, and Learn Live with 149% week-over-week registration growth; collaborated with Partner Marketing on case studies and ecosystem narratives that showcased platform adoption, positioning the ecosystem as an integrated productivity system rather than a collection of individual tools.
- Built the ecosystem segmentation model from EAP and GA adoption data, identifying distinct developer and enterprise cohorts, surfacing a \$100M+ expansion opportunity in the install base, and defining Time-to-Value benchmarks adopted as standard measurement KPIs across 6 product and partner teams.
- Founded the AKS Partner Forum to generate compounding network effects across the SI ecosystem: 200+ partners enrolled, quarterly cadence established, each new partner increasing distribution value for the existing base — the same network effect logic that makes a marketplace compound.

Product Marketing Manager — Azure Data & AI

Jul 2022 – Jul 2024

- Built the partner evidence and ecosystem case study program from zero across 40+ enterprise accounts, reducing case study sourcing time by 90% and delivering the World Bank flagship story at Microsoft Ignite; contributed to scaling Azure Arc SQL Server to a \$10Bn product business.
- Developed persona-specific messaging architecture for Azure Arc SQL Server across three buyer segments, database administrators, IT directors, and C-suite infrastructure owners, translating one technical capability into three distinct value narratives tied to each persona's definition of success.
- Synthesized VoC from 100+ field account engagements into competitive benchmarking reports, adoption pattern analysis, and investment recommendations delivered to product and partnerships leadership, tracking where the ecosystem was winning, where it was losing to alternatives, and making the evidence-based case for where to prioritize next.

Servier · *Senior Product and GTM Lead*

Sept 2020 – Sept 2021

- Built the full GTM and partner enablement toolkit from zero across a multi-stakeholder ecosystem spanning specialist physicians, hospital procurement, and payer channels; produced pitch decks, solution briefs, competitive battlecards, and demand generation programs that drove 200% adoption growth and 40% revenue increase in 18 months.
- Conducted structured competitive benchmarking across rival therapies and adjacent treatment categories, translating findings into sharper positioning frameworks, updated battlecards, and investment recommendations that informed where to concentrate supply-side partner and channel resources for maximum market impact.
- Briefed medical advisory boards, KOL networks, and institutional thought leaders to elevate ecosystem visibility and shape market narrative, the clinical equivalent of analyst relations in a regulated environment where third-party credibility determines which solutions get adopted across institutional buyer channels.

Bayer · *Country Marketing Lead — Product Adoption & Growth*

Mar 2019 – Aug 2020

- Led full GTM strategy and marketplace activation for Eylea (afibercept) across Ophthalmology and Cardiology portfolios on a complex regulated infrastructure platform, achieving 300%+ of adoption target in 6 months and 8-figure revenue within 12 months by defining supply-side partner channel strategy and demand-side physician and payer messaging simultaneously.
- Built pitch decks, competitive benchmarking frameworks, and demand generation programs that positioned ecosystem solutions as extensions of the core clinical evidence base rather than standalone products — the same "extends core" framing that drives marketplace adoption in platform ecosystems where standalone tools lose to integrated solutions.
- Engaged KOL networks and institutional thought leaders as the equivalent of analyst relations to shape external market narrative, drive third-party validation, and ensure ecosystem solutions were woven into major medical congress moments and clinical education events — securing the credibility that determines institutional adoption in high-stakes buyer environments.

Novartis · *Product Marketing* · *Specialty Portfolio*

April 2016 – Mar 2019

- Drove 35% YoY franchise growth with 60%+ conversion rate through data-driven ecosystem segmentation and structured competitive benchmarking against rival therapies, tracking adoption patterns across the specialist physician base to identify where the ecosystem was gaining share and where to concentrate demand generation investment.
- Built demand generation programs and partner channel enablement materials that extended core product value into adjacent institutional buyer channels, developing the analytical GTM discipline of translating adoption data into investment recommendations that maps directly to ecosystem portfolio prioritization in a platform context.

EDUCATION & CREDENTIALS

Tuck School of Business at Dartmouth · <i>MBA</i>	2023
Olabisi Onabanjo University · <i>Bachelor of Science</i>	2013
Birchwood University · <i>MS, Data Science</i>	2027

Certifications: PMP · Microsoft Azure Fundamentals (AZ-900) · Azure AI Fundamentals (AI-900) ·
